

**Worldclass Internal Measurement  
for more than 40 years**

## **MICROTEST® 3-point Internal Micrometer**

- huge measurement ranges from Ø 30 to 400 mm  
in 6 Instruments only, max. Ø 1150 mm
- highest precision : Linearity  $\pm 2 \mu\text{m}/\pm 3 \mu\text{m}$ , repetition  $\pm 1,5 \mu\text{m}$
- scales: 1  $\mu\text{m}$  read out, paralaxfree / 1 turn=1 mm  
direct full read out 1 mm, 0.01 (100 div. / turn), 0.001 (nonius)  
no readout errors
- automatic self centring for easy and save handling
- "blind hole" measurement down to the base in deep holes
- length extension up to many meters without precision reduction
- thermal-protected and -compensated construction
- automatic linear wear correction throughout easy adjustment
- cost reduction throughout multiple ranges,  
less expenses for calibration and certifying
- high accurate performance, low cost
- Made in Switzerland

## **MICROTEST® SLOTMASTER**

**The ultimate Measurement-System for slots and grooves  
For measuring axial length outside or inside**

- easy, fast, accurate measurement
- accuracy  $\pm 0.02 \text{ mm}$
- read out 0.01 mm by dial gauge
- shockproof
- spray water protected
- measurement range 0/1,2-30 mm / 30-60 mm
- interchangeable probes to extend the measurement  
range up to 120-150 mm
- special equipment on request
